

Introduction

This report aims to provide a personalized health routine based on your astrological sign and the 12 salt mineral deficiencies associated with each sign. It will also include a calendar that automates the display of symptoms and remedies based on your birthdate and current planetary transits, drawing insights from the book "Medical Astrology: A Guide to Planetary Pathology" and other reliable sources.

The 12 Salt Mineral Deficiencies and Their Corresponding Astrological Signs

The concept of linking salt mineral deficiencies to astrological signs is explored in the book "The Zodiac and the Salts of Salvation" by Dr. George Washington Carey and Inez Eudora Perry. According to Dr. Carey, each zodiac sign is prone to a specific cell-salt deficiency, and replenishing these salts can help cure diseases and ailments. Here's a table summarizing the 12 salt mineral deficiencies and their corresponding astrological signs:

Astrological Sign	Salt Mineral Deficiency
Aries	Potassium phosphate
Taurus	Calcium fluoride
Gemini	Potassium chloride
Cancer	Calcium fluoride
Leo	Magnesium phosphate
Virgo	Potassium sulphate
Libra	Sodium phosphate
Scorpio	Calcium sulphate
Sagittarius	Silica
Capricorn	Calcium phosphate
Aquarius	Sodium chloride
Pisces	Iron phosphate

Foods Highest in Each Salt Mineral Deficiency

Here's a table listing the richest food sources for each salt mineral deficiency:

Salt Mineral Deficiency	Richest Food Sources
Potassium phosphate	Seeds (poppy, sesame, celery, chia), cheese, yogurt, sardines, canned salmon, beans, lentils,

Salt Mineral Deficiency	Richest Food Sources
	almonds, whey protein, leafy greens, rhubarb, fortified foods, amaranth, edamame, tofu, fortified drinks, figs, milk
